

BC SOLUTIONS
Blood Bank Validation

SCC SOFTBANK®

Operational Qualification (OQ) Validation:

BC Solutions uses the R.F. Nozick Blood Bank Validation developed by a team of Blood Bank experts & laboratory clinicians. This proven system of validation is key in providing the efficiency that saves valuable time and resources while maintaining a high degree of patient safety. With the R.F. Nozick Validation Program you can rest assured you are audit ready & operationally safe for your patients.

SCC SoftBank:

In this type of Validation Testing, the computer system and process operating parameters will be challenged to ensure that they will result in a product that meets all defined user requirements under all anticipated conditions. All Validations include our Matrix Analysis & Validation Report providing easy access to evidence of validation & corresponding regulatory requirements, making your next visit from an auditor as simple as possible.
