
JOB DESCRIPTION: BECS Software Validation Consultant

SUMMARY DESCRIPTION

BC Solutions (BCS) is looking for the right candidate to perform validation and testing of Blood Establishment Computer Systems (BECS). Experience with Donor systems and Donor regulatory requirements is required. This position is 100% remote (work from home).

RESPONSIBILITIES

- Review of client process, software configuration, and development of validation test plans.
- Maintain User Requirements based on current regulatory requirements.
- Direct client communication.
- Provide assignments and training to other team members.
- Ability to manage projects independently to meet client and BCS expectations.
- Participate in company meetings and initiatives.
- Independent problem solving, time management, and clear communication skills.

ESSENTIAL EXPERIENCE

- Familiarity with software validation and testing projects; direct experience preferred
- Knowledge and experience using FDA, AABB, CAP, and ICCBBA regulatory requirements
- Donor/Transfusion Service experience required. Software vendor experience a plus.
- Basic proficiency with project management activities, tools, and techniques
- Ability to problem solve and negotiate issues related to project management and software.
- MT/CLS certification required

PREFERRED EXPERIENCE

- Technically proficient with remote access protocols (Citrix, RDP, SecureLink)
- Participated directly in developing and maintaining quality control processes in a Donor facility
- Previous experience working remotely is a plus
- SBB certification

ABOUT BC SOLUTIONS

BC Solutions is committed to providing the highest quality consulting services to our clients by meeting or exceeding their requirements and those of industry regulatory agencies. This is achieved by continually improving quality, building relationships, and developing innovative ways to excel.

QUALITY

BC Solutions is committed to the highest quality standards in all that we do. We know that quality processes, people and communication lead to the delivery of quality products and services. We develop quality processes and services that deliver value and enhance patient safety in clinical laboratories.

RELATIONSHIPS

BC Solutions values customer, employee, family, and business relationships. We are committed to strong and lasting relationships that provide positive developments for our business and families. We allow our customers to leverage our expertise to enhance their delivery of products and services to their patients. Open communication, respect, trust and confidentiality are core to our business. (cont.)

INNOVATION

BC Solutions aggressively pursues deliverables and customer satisfaction. We have the ability to use well-structured business processes to meet the ever-changing landscape of customer needs. BC Solutions knows that one solution does not fit all clients and we will structure solutions to meet specific client's needs. Our experience and enthusiastic behavior allow us to meet our customer needs and resolve issues in a timely manner.

PROFESSIONAL DEVELOPMENT

Our employees are at the heart of BC Solutions. They have made BCS what it is today and their expertise, capabilities, and high level of engagement are always laying the foundation for our future success. We must continuously develop our employees to stay competitive and carry us forward. BCS employees should actively seek out challenging assignments, take advantage of educational opportunities, and read professional publications or participate in forums to stay current on new developments related to their positions.
